Berbuku.com is an Web Book Store Application for people who want to buy some book via online. Its goal is enable you to buy some book much simple, faster than you could if you were buying a book from bookstore outside your house. Berbuku.com lets you simply focus on book you want to buy by minimazing the amount of time, energy and price to stand on bookstore.

This using Framework CodeIgniter PHP and configure mysql-server for its database. So, its have some fitur from CodeIgniter that bringing better performance with MVC-pattern. Include design, Berbuku.com using html code, jquery and pictures made by using corel draw and photoshop. It is currently developed and maintained by Kelompok 85. They are **Kurniawan Wira Handito**, **Darin Dindi Fadhilah** dan **Dibaj Tyarastuti Putri**. And Also under bimbingan Mr. Antonius Duty. Thanks to God, also to Mr. Antonius Duty, Mr. Aris and Mrs. Iffa as penguji and all who support Berbuku.com, made for Project Work 2013 SMK Telkom Sandhy Putra Malang.
